## Career Profile

---

Master of Information Technology graduate with hands-on experience developing software through industry and open-source projects. Skilled in C++, C#, JavaScript, backend development, automated testing, debugging, and Git-based Agile workflows. Proven ability to build reliable software, solve technical problems, and collaborate with cross-functional teams to deliver high-quality solutions. Fast learner with experience using AI-assisted development tools to improve productivity and deliver practical engineering outcomes.

---

## Education

---

07/2024 – 06/2026

### Master of Information Technology

Deakin University, Melbourne

- Major: Software Engineering
- Achievements: Distinction Average

---

## Relevant Experience

---

03/2026 – 6/2026

### SplashKit – Core Team

Thoth Tech, Melbourne

- Developed and maintained automated unit tests in C++/C# for the SplashKit Core Library, improving the reliability and quality of networking, vector operations, and resource management modules.
- Implemented comprehensive **TCP/UDP networking** test cases, validating core networking functionality and reducing regression risks through automated testing.
- Collaborated in an **Agile** development team using **Git** and **GitHub**, contributing features through pull requests, incorporating peer review feedback, and delivering maintainable, high-quality code.
- Conducted code reviews and coordinated the team's pull request review process, promoting coding standards, knowledge sharing, and timely integration of software changes.

07/2025 – 10/2025

### City of Melbourne Open Data (MOP) Project – Web Dev Team

Chameleon - Smarter World, Melbourne

- Led backend development and team coordination for the *Melbourne Open Data* project, advancing Melbourne's smart city initiatives.
- Designed a standardized **Git workflow**, documented and guided **migration from MongoDB to PostgreSQL**, and implemented a **search API** with category-based filtering to enhance data accessibility.

- Facilitated **backend sync meetings**, aligned tasks with sprint objectives, and coordinated closely with frontend and data science teams to ensure seamless integration and timely delivery.
- Demonstrated strong **technical leadership and team coordination**, promoting accountability, clear communication, and alignment with long-term project goals.

---

## Employment

---

**08/2024 – Current**

**AI Training Specialist**

Outlier, Remote

- Reviewed and optimized AI-generated code to ensure **accuracy, efficiency, and adherence to software engineering best practices**, improving model output quality by reviewing 1000+ AI-generated code.
- Developed and refined **prompt structures and test cases** to enhance model performance, contributing to more reliable and context-aware code generation.
- Provided **structured, data-driven feedback** on AI model performance, influencing iterative product improvements and enhancing end-user satisfaction.

---

## Professional Memberships

---

**07/2025 - Present**

**Associate Member**

Australian Computer Society

---

## Professional Development

---

**04/2025**

**Data Scientist Associate**

DataCamp
